=====

===== #33. Christmas Tree Worms Christmas tree worms are also called Jewel stones. They are the beautiful worms living in coral reefs. Their Christmas tree plumes grow up to one inch tall to breathe and catch food.

#32. Mantis Shrimps Despite its beautiful looking and small size (one foot), mantis shrimps are one of the most dangerous hunters in the sea. Their claws can strike as fast and powerful as a bullet and break the aquarium glass. They can capture big fish easily, or crush crabs and snails with one blow. Their vision is two times better than the humans and they can see in the dark.

#31. Red-lipped Batfish The Red-lipped batfish doesnt like to swim. They walk on the seafloor over 100 feet deep. ... #25. Horseshoe Crabs Horseshoe crabs can grow over 20 inches but weigh only about 5 pounds. Though named crab, they are closely related to spiders and scorpions. They have blue blood. They are called

living fossils since they appeared 450 millions ago that was 200 million years earlier than dinosaurs. ... #22. Goblin Sharks Goblin sharks are the living fossil. It has been living on Earth since 125 million years ago when dinosaurs were running. Their saggy muscle and tiny fins dont move the pink bodies fast at all. But their long snouts can catch the weak electric fields produced by the fish nearby. ... #15. Platypuses Platypuses are the only mammal that lays eggs instead of giving birth to babies. They have duck beaks, beaver tails, and otter feet. They are one of the few poisonous mammals. The male platypuses have spurs that can inject very painful venom. ... #3. Eastern Long-necked Turtle Eastern long-necked turtles necks can be as long as their shells. They have powerful, webbed feet for swimming, digging, and hunting. They shoot stinky fluid at enemies and get a nick name stinker. ...
