

Intermediate 2 Physics: With Answers

This new course, part of the Higher Still framework, is the main route for students achieving General level at Standard Grade, and is the perfect lead up to the Higher course. Baillie and McCormick's new book matches the arrangements exactly, and will be the ideal course text for students. It is structured around the four main units of the course; mechanics and heat; electricity and electronics; waves and optics; and radioactivity. The new assessment arrangements are covered, with plenty of material, explanations and examples. A without answers version is also available.
