

A New Era Of Nuclear Structure Physics: Proceedings Of The International Symposium, Kurokawa Village, Niigata, Japan 19 - 22 November 2003

This book is a collection of invited talks, oral contributions and poster contributions devoted to advances in nuclear physics. It covers a broad range of topics on nuclear physics, including nuclear force, hypernuclei, nuclear structure, exotic nuclei, clustering, mean-field method, shell structure, nuclear deformation, unstable nuclei, and related topics.
