

## and the floor was always lava

And the Floor was Always Lava is a collection of memories (or essays, if you're into that kind of thing). The twenty-four year old narrator reflects back to her four year old self, placing her memories in the context of all she's learned since they occurred. The collection is a unique twist on the classic coming of age story, in which the narrator explores and sorts through the pieces of her life that have changed with time and growth, and the pieces that are different, but kind of the same. This is the debut collection of Michelle Junot.
