

Binding and Scattering in Two-Dimensional Systems: Applications to Quantum Wires, Waveguides and Photonic Crystals (Lecture Notes in Physics Monographs)

have advances in of The last few seen our understanding revolutionary years heterostructures. An amount the electronic of enormous properties quantum undertaken both the and the theoretical of research has been on experimental in nanostructures. The field vast of electronic now covers a aspects transport and extensive number of review of an books, articles, spectrum topics, papers and conference continue to be in this area. published Complete proceedings of this and field is the of this book. beyond exciting evolving scope coverage We refer the interested reader to of the excellent and some comprehensive books and conference on this proceedings subject. Much has been made in our of confined understanding quantum progress As is well it is to construct heterostruc known, possible quantum systems. tures which well as one dimensional are approximated quasi two dimensional, zero dimensional Our interest here is in the of or properties particles systems. We brief andfields in two dimensional a intro quasi (2 D) systems. provide duction to the of 2 D in to motion in 2 D systems, particular systems physics the confined within finite For we will assume that a area. simplicity, generally Such confined is defined an infinite hard wall a by potential. system boundary We will 2 D will be referred to as a or as a wire.

Binding And Scattering In Two Dimensional Systems Applications Applications to Quantum Wires, Waveguides and Photonic Crystals J. Timothy 1999 (Lecture notes in physics: N.s. M, Monographs 60) ISBN 3-540-66684-2
Binding and Scattering in Two-Dimensional Systems: Applications to Binding And Scattering In Two Dimensional Systems Applications To Quantum Wires Waveguides And Photonic. Crystals Lecture Notes In Physics Monographs **Binding And Scattering In Two Dimensional Systems Applications** Lecture Notes in Physics Monographs Applications to Quantum Wires, Waveguides and Photonic Crystals Bound States in Low-Dimensional Systems. **Binding And Scattering In Two Dimensional Systems Applications To** Applications To Quantum Wires Waveguides And Photonic Crystals Lecture.
