

Raum-Zeit (Grundthemen Philosophie) (German Edition)

The philosophical treatment of space and time has had a long history. This continuing interest stems not least from the fact that space and time form the basis of movement. Space-time philosophy encompasses a wide range of subjects, many of which, on first inspection, do not seem to have anything to do with space and time. Space-time philosophy is a matter of causality and probability, the Big Bang and Heat Death. It is a matter of the origins of each term's meaning and the inability to experience space-time theory first hand. It is a matter of Achilles and the turtle, as well as, Maxwell's demon. In dealing with space-time, one does not deal solely with space and time.
