

## Creativity in Public Relations (PR in Practice)

Creative input is inevitably required of the PR practitioner, and yet many PR practitioners lack a real understanding of the creative process. Creativity in Public Relations addresses this situation. It guides the reader through a range of techniques and tips for generating creative ideas, as described by the five Is of the creative process: information, incubation, illumination, integration and illustration. Among the topics it explores are: techniques for stimulating ideas, ways to evaluate ideas, obstacles to creativity, the creative individual, and the creative organization. It includes practical examples and research carried out by those in the PR industry who are regarded by their peers as creative. By clearly establishing a definition of creativity, this third edition will help PR practitioners use the creative process to greater effect in their work.
