

Unidentified Airborne Phenomena Volume 3 - 51 AD To 145 AD: Novel Statistical Analysis Results of UFO Reports From 250 BC To Present Time

As we move on with the 21st Century, the question of whether we are alone on Earth or were visited by different intelligent life forms persists. Aside from the elusiveness of the answer, the sheer amount of data, reports, misrepresentations and occasional false claims make it almost impossible to separate fact from fiction, and to tell what UFO reports are genuine or not. In addition, as the United States Air Force LRS-B is about to become operational within the next few years, its cloaking capabilities (thus displaying many formerly UFO reported attributes) will often lead to sightings that will greatly increase the volume of available data. This will lead to even more elusiveness of the question of whether we are alone on Earth. The Unidentified Airborne Phenomena - Novel Statistical Results of UFO Reports From 250 BC To Present Time is an unique and extraordinary approach to answer the question conclusively. With a panel of 113 scientists and engineers of different backgrounds and at the cost of over 15 million dollars, the project assesses each relevant UFO report from antiquity until modern days in a way never before attempted, and reports the statistical results in the plainest language. The project separates truth from fiction or misreporting and lifts the veil of doubt on each and every analyzed report by determining in a concise and scientific way the veracity of such reports. With remarkable scientific elegance and plain language, the project provides a very precise answer as to how genuine significant UFO incidents were, and how likely is it that they were, indeed, depictions of real events. We now have a clear answer as to how genuine UFO reports are, individually and one by one, on their own merits. Easily readable and understandable by anyone, the current volume brings a surprising and unexpected way to analyze and assess the massive UFO data we have to date by taking a

completely different and revolutionary view on the resolution of the UFO issue. Volume 3 publishes the analysis results for UFO reports from 51 AD to 145 AD.
