

Americas silent killer: Self-help Sexual Knowledge

This book titled: STD (Sexual Transmitted Diseases) Americas Silent Killer should be in every household in the United States. The intention of this book is to educate our young people of the many consequences to losing their virginity (male or female). This may not be that consequential to a lot of people, but if you only knew what you were giving up and might catch, you would think twice. You're giving a piece of your heart and your body to someone that you may not even marry. Every time you sleep around you're losing less and less of yourself to different people. The odds of catching a STD really goes up. Love, it's something most of us seek. Some of us find it and some don't. Through sex, we can't find it unless after marriage when it is ordained. Don't let your emotions rule over your intelligence. Usually regret is the only thing left after premarital sex. Sometimes it may not seem like it, but deep down the feeling of something is wrong. Then regret sets in. Save yourself for that special someone that deserves you and likewise. It can get challenging when your lifestyle is sleeping around, but if you really value yourself, your body, and your health then you will stop and save yourself from here on. You're special and precious. Save yourself for someone who will see you as the same. There is an eerie silence about STD in the United States. Our public figures and institutions of all kinds should be making the public aware and do something about it. We must do something to get this epidemic under control or we all will be destroyed, not by the Terrorists but by our own lifestyles. Here are some conditions that must be addressed with urgency: Strong Sex and Consequences classes in the schools. Public awareness on the cost of STD. Advocating morals, marriage and family values. Sexual Transmitted Diseases STD Transmission and the Law Sexual Lifestyles (Morality & Ethics) Medication and Treatments Therlee
