

Hadron Spectroscopy: Ninth International Conference, Protvino, Russia, 25 August - 1 September 2001 (AIP Conference Proceedings)

The proceedings of Hadron 2001 cover up-to-date experimental and theoretical results in light and heavy meson spectroscopy, baryon spectroscopy, hadron dynamics at low energy, and future facilities for hadron spectroscopy. New results on hadron spectra and interactions from different experiments are presented and the latest theoretical ideas and calculations are discussed. Topics include: vector states, light mesons from charm decays, heavy Q spectroscopy, exotics, scalars, nonperturbative QCD, history, baryons and qq plasma, phenomenology, standard model, new facilities, heavy ions, charm and beauty decays, states with open/hidden strangeness, low energy, radiative decays, chiral theory, deuteron.
