

The Theory of Measurement (Philosophy Shorts Book 50)

In this concise study, the basic principles of measurement-theory are stated. Topics covered include: Measurement vs. enumeration; Triangulation and precisification; Diachronic vs. synchronic measurement The role of irrational numbers in measurement; Metrical conventionalism (conventionalism as to metrical standards) and nomic conventionalism (conventionalism as to the laws of nature); Coordination of distinct metrical norms and the concomitant generalization of otherwise context-specific metrical concepts; Additivity and non-additivity of volume, mass, and other magnitudes, in relation to Relativity Theory; and Scalar vs. vector magnitudes.
