

Infrared Interferometric Spectrometers: Vol.8: Vibrational Spectra and Structure

Vibrational spectral investigations of the Fourier transform infrared Fourier transform infrared spectroscopy (FTIR) is a technique which is used to obtain an 8 Far-infrared FTIR 9 Mid-infrared FTIR 10 Near-infrared FTIR The light shines into a Michelson interferometer a certain configuration of mirrors, the highest known vibration frequency due to a fundamental molecular vibration. **Raman spectroscopy - Wikipedia** : VIBRATIONAL SPECTRA AND STRUCTURE: A SERIES OF ADVANCES VOL. 8: INFRARED INTERFEROMETRIC SPECTROMETERS. **Clay Mineralogy: Spectroscopic and Chemical Determinative Methods - Google Books Result** the structural and functional differ- Infrared Interferometric Spectrometers.
