

Sharks

Do sharks see clearly? Are sharks intelligent? Do all sharks attack people? Designed in a question-and-answer format, this book examines the lives and characteristics of many of the 360-plus known species of shark, including the Hammerhead, the Great White, the Whale Shark and the Bamboo Shark. The book answers many questions about the way sharks live, how their bodies work, how they protect themselves, their eating and reproduction habits, and their relationship to people.
