Kairos: Harnessing time and emergence in complex projects
Einstein asserted that time isnt constant, but depends on the speed youre travelling. The Ancient Greeks, and Project Managers who deal with uncertainty and complexity on a daily basis, have known this for ages. The ticking of a clock what we term Chronos time - is constant; but Kairos time expands and contracts according to the task-at-hand, and needs to be grasped as it flies by. If we get the timing right, we can take advantage of the emergent opportunities get the timing wrong, and monsters will jump out from behind trees and eat us up. Kaye Remington is an internationally-acknowledged expert in the field of complexity, and in this eBook, she describes how to grab Kairos by its forelock and exploit it to the best advantage.
