

Miladys Aesthetician Series: Advanced Hair Removal

Advanced Hair Removal, part of Miladys Aesthetician Series, provides a modernized approach to hair removal that dispels rumors, old wives tales, and half truths about hair growth, hair removal, and the techniques that are associated with the procedures. This text takes all of the dated information about lasers, waxing, sugaring, threading, and electrolysis and modernizes it to include the latest information available on the subject. Designed to act as a learning and teaching tool for students and instructors and a resource for practicing aestheticians, this text discusses the must-know topics of anatomy and physiology, patient interviewing, charting, techniques, and how to grow a hair removal business, and includes patient studies, photographs and recommendations for treatment. To best understand the processes of hair removal, the reader will follow several candidates through different hair removal techniques and observe the results. Documentation of treatment plans, interviewing techniques, and patient recommendations are made available to the reader. In addition, the book discusses the use of lasers, who can perform this procedure, how it works, and why it may be the single prong in the hair removal plan for a patient. With its simple, non-intimidating approach, this handbook provides the reader with advanced, updated, and need-to-know information about the hair removal process.
