

Not Julie

Ray Bonns name never occurred to her, as indeed it did repeatedly throughout every waking state, without being followed by a significant pause. He had been that kind of person -- one whose memory is always followed by a significant pause. These pauses were not initially filled by any thought at all. It was as though there were some kind of shuffling going on in her brain to an appropriate thought to think in his regard. But it was also as though there were some mechanism at work in shuffling certain thoughts back out of sight. Yes, there was definitely an aspect that must be thought about when she had time. Well, it wasnt as though she had not had the time these last months. But then as Ray would probably have said, there is no such thing as time. Time and space are just relations that specify how far an observed event is from the one who observes it. That is all there is to time. Those events and her observations of them had been a long time ago now even if sometimes it seemed like yesterday. But today it seemed again as though it had been a long time indeed, but she was using the term differently again... This event right now in this place and time, staring out through the landscaped shrubs and small manicured trees to the wooded cascades with their bare clear-cut patches out across the unseen reservoir was so awfully far from any of those events that mattered. One doesnt really have the privacy in these places to sit and ponder without being at risk for having ones medication upped, does one, Reverend? The smiling reverend Randolph Etherington had entered and settled in beside her now. No. I guess thats true, but I wont tell. Am I disturbing you, Julie? Oh no. Theres lots of time until there isnt. She returned his smile. Penny for those thoughts. Then, I wont turn you in. If we smile a little and insert a chuckle here and there, theyll think they have the dosage just about right. One of those deceptive

chuckles was inserted here that defied her to not respond in kind. Her upper teeth grabbed a flabby lower lip that had once been so full and sensuous. Watching her, Randy added, Ray Bonn, Ill bet. ... More than four decades earlier Ray Bonn had published a book, having no illusions of grandeur. He just wanted to get his innovative alternative physical theories out there where they could be evaluated. But in the process of an unusual promotion on his first attempt, he was ensnared in weird contractual commitments. In a Kafkaesque turn of events, he had been duct taped to a contract by a beautiful but quite capricious woman with whom he had become infatuated.
