

## Covert and Overt in the Evolution of Life and Consciousness

bility to think put man at the top of the evolutionary hierarchy in the material world renown to us. Although, scientific knowledge is capable, in principle, to explain all the world, it is a kind of progressive trap for the mind of man ... Every new major discovery made by scientists in a particular field of knowledge, reinforce Humanity in its thoughts about being exclusive not only on Earth but throughout the universe. Proud prevents us from realization that we are only one of the tools of living nature, its artisan, performing a well-defined, rather dirty work, which is part of the incomprehensible for our mind, Whole .
