

Realization of Einsteins Machian Program (Distinguished Men and Women of Science, Medicine and the Arts)

This book is a solution of the so-called Einsteins Machian Program, that left Einstein very angry and frustrated, for he was unable to reconcile Relativity Theories with Ernst Mach ideas, that by looking into the Cosmos as a whole, absolute motion could be found. About one hundred years ago, the discussion led to no conclusions among physicists, so that now Berman found that the existence of a Universal rotation, was compatible with General Relativity, and that this rotation is absolute. Berman thus solved the problem.
