

Poisoned Science: (The 1960s Corruption of Scientific Methods for Careers and Causes)

The demonstration that the physical sciences have substituted false science for their ignorance concerning anomalous discoveries since the 1960s. They have achieved this by following a philosophical deconstruction of language which removed scientific categories from objective references to subjectively imposed meanings established by a social consensus. This practice was followed to establish a false Big Bang cosmology, an absurd standard model particle physics and, most recently, an emerging scientific fascism in the politically enforced greenhouse gas model of climate change. In all these cases, the theoretical poison injected by the false sciences is easily corrected by quantum-dimensional maths reformation of primitive quantum mechanics.
