

Naked Guide To Life And Death:: Experts, Extremism, Evolution, Education

How many ways are there to approach life? Who is trying to get you to buy into their view of the world? And what do they have to gain by convincing you they are right? In his book *Naked Guide To Life And Death* author David Jon Peckinpaugh seeks to unmask the attempts to convince us that things are a certain way, according to how the so-called experts see the world, often resulting in a far more narrow and limited perspective than one might initially suppose. His main thesis is that expertise of all kinds can result in our being seduced into knowing something as being so, when it, in fact, is not nearly so evident as the experts tend to make it seem. In throwing off the veil of religion and science, psychology and philosophy, consumerism and commercialism, Mr. Peckinpaugh performs an endearing service on behalf of us all, humanity. Suggesting that beyond the often contracted and tight spaces of expertise, hence, extremism, there are wide open spaces still inviting to those who dare to entertain the wisdom of not-knowing.
