

A Simple Illustrated Lesson on Particle Physics: -An Introduction to Gauge Theory-

This is a picture book in which a super string worm from a worm hole tells the world of elementary particles. Tabinchu Terada is a Bachelor (neither Doctor nor Master) of Science who wished to study particle physics but failed to understand elementary quantum mechanics. He once again attempted to understand particle physics through thorough independent study more than ten years after graduation. Through his new work, he aspires to depict the world of elementary particles in a simple manner.
