

Sound (Gareth Stevens Vital Science: Physical Science)

Gareth Stevens Vital Science books are designed to help prepare students for NCLB science testing by reinforcing key concepts across the science curriculum. The eight volumes in Physical Science use clear language and a variety of photographs and diagrams to increase students understanding of forces and motion; light, heat, electricity, magnetism and sound; and the properties of objects they encounter in their daily lives. Two volumes discuss the history of science and the role of science in society. Features and benefits: - Concepts that support National Science Education Standards (NSES) and state standards: - Physical Science- Science in Personal and Social Perspectives- History and Nature of Science- Text developed in consultation with a science curriculum expert- Clear explanations of key scientific concepts- Full-color photographs, diagrams, and other illustrations that enhance understanding- Focus boxes that supplement the text- A glossary of key terms
