

Science and the Akashic Field: An Integral Theory of Everything

Presents the unifying world concept long sought by scientists, mystics, and sages: an integral theory of everything Explains how modern science has rediscovered the Akashic field of perennial philosophy New edition updates ongoing scientific studies, presents new research inspired by the first edition, and includes new case studies and a section on animal telepathy Mystics and sages have long maintained that there exists an interconnecting cosmic field at the roots of reality that conserves and conveys information, a field known as the Akashic record. Recent discoveries in vacuum physics show that this Akashic field is real and has its equivalent in sciences zero-point field that underlies space itself. This field consists of a subtle sea of fluctuating energies from which all things arise: atoms and galaxies, stars and planets, living beings, and even consciousness. This zero-point Akashic field is the constant and enduring memory of the universe. It holds the record of all that has happened on Earth and in the cosmos and relates it to all that is yet to happen. In Science and the Akashic Field, philosopher and scientist Ervin Laszlo conveys the essential element of this information field in language that is accessible and clear. From the world of science, he confirms our deepest intuitions of the oneness of creation in the integral theory of everything. We discover that, as philosopher William James stated, We are like islands in the sea, separate on the surface but connected in the deep.
