

## C2CR07: Colliders to Cosmic Rays (AIP Conference Proceedings / High Energy Physics)

The C2CR series provides a forum in which physicists from different, yet closely related, sub-disciplines get together and explore the interfaces and overlaps. The overlaps between various approaches to Dark Matter, in direct searches, in Cosmology and in Colliders are all too obvious. These issues are highlighted in the challenges faced by those who develop simulation packages for various physics processes.
