

The SEO Blueprint

Finally a book on SEO for business people and marketers who are not webmasters! For many small to medium sized business being found on the internet remains elusive, yet today almost all buying decisions begin on the internet. Robert shares with readers in easy to understand language how search engines work, how to optimize your website to be found by search engines, effective link building strategies. Most importantly Robert lays out the SEO Blueprint, a step by step process for getting ranked in search. What is so powerful about the SEO Blueprint is that once you have read this book you will be able to effectively communicate with webmasters or SEO consultants (if you choose to use them) to get the results you have only been dreaming about. This is a must have for every small business owners and marketers library
