

Small capital investing: Make money trading corporate event arbitrage

Are you starting to realize that buying stocks will never get you rich unless you start with a lot of money or are ready to wait for decades? The simple reality is that to make a small account grow fast without taking extreme risk you have to look for situations where you have a higher advantage. This is a short book detailing a working arbitrage trading strategy taking advantage of the way institutions handle corporate events. This strategy is quite limited in the amount that can be invested (this is why it still works) and is mostly useful for the small retail investor who want to build his account into a middle sized one. If your current account size is between \$1000 and \$20000 a 100% return on a year with little risk is doable. This book contains all details on how it works, why it works and how to set up a system for sourcing arbitrage ideas. It also details two case studies that were real trades I made.
