

# Financial IT Design for Strategic Management (Global Competitive Skill of Strategic Management)

This manual provides the business person to want to become strong in accounting the point 80 of the knowledge design which becomes strong in the management value and the accounting system . That it is possible to do the notional understanding of accounting knowledge at the this manual even if there is not knowledge of the bookkeeping, the finance and the management accounting, it incorporates illustration into everywhere and it is devising it. It is putting an emphasis on the introduction of the flow, the business flow of the computation logic and the dater, too. In the accounting system, because the cooperation with the various transaction processing system becomes important specifically, it becomes a point by whether or not it is possible to have the ability to plan a system that it is possible to do the grasping of the picture of the business activity. So as not to become the book which is called so-called seeing a tree and not seeing a forest that the whole can not not be seen even if it understands a part, it adopts the viewpoint. As for the business person which is weak at accounting field, the this manual can understand the bookkeeping, the financial accounting, the management accounting, cash-flow accounting which is indispensable for the business management, and basic essence about International Accounting Standards and the practicing approach technique of the accounting system building. Here, lets introduce contents in each chapter. In the skill of the 1st chapter. bookkeeping and the financial accounting , basic knowledge about the mechanism of the accounting procedure is described. It clarifies the way of thinking and the rule of the basic knowledge, the dealings, the journalizing, the payment, the posting of the bookkeeping. Moreover, it understands the creating of a major book, and an auxiliary book, a trial balance sheet and a settlement of accounts procedure and the basic skill of

the bookkeeping is made to be able to be won. In the skill of the 2nd chapter. management accounting , it masters accounting knowledge which is indispensable for the business management. Financial accounting and a management accounting, the framework of the costing, the mechanism of the standard costing, job order cost accounting and process costing, a break-even analysis, an analysis of the affairs of a business evaluation index and ABC accounting are explained, being concise about throughput accounting. In the skill in 3rd chapter. cash flow accounting , it understands the quintessence of the cash flow management. It is in the statement of cash flow, the tactical approach to cash flow improvement by the sales, the investment and the finance, the capital budgeting, the net-present-value law. In the skill of the 4th chapter. international accounting , it grasps the trend of the indispensable international accounting base as the business person. It is in the consolidated financial statement, the current value accounting, derogation accounting, the accounting for income taxes, software accounting, retirement benefit accountings. In the practice skill of the 5th chapter. system-construction , it understands the information system of the business activity practicing-ly. This place multilaterally understands almost the way of thinking of the management strategy and the system-construction which is basic. Next, it catches the case of the practicing accounting information system building in the wide field of the business activity and it understands it. As the practicing case, it introduces about the financial accounting and financial control system, the cost system, the purchasing-management-system, the production management system, the marketing management system and the physical distribution management system.
