

# The End of Energy Obesity: Breaking Today's Energy Addiction for a Prosperous and Secure Tomorrow

Praise For The End of Energy Obesity  
Peter Tertzakian has succeeded once again. He outlines a visionary approach to meeting the serious challenges of the world's projected population growth, continued economic growth, and increasing living standards. This book is a clarion call to policymakers, business leaders, and energy consumers everywhere. Guy Caruso, Senior Advisor, CSIS, Washington, D.C. (former Administrator, U.S. Energy Information Administration) Peter Tertzakian is one of the great energy thinkers of our time. In this compelling book, he examines the factors that will drive global energy demand and addresses the critical energy issue of our time: How can mankind bring its ever-growing demand for energy under control? Hal Kvisle, CEO, TransCanada Corporation Anyone interested in understanding the forces that drive conflict and instability when it comes to energy should read Peter Tertzakian's important book, *The End of Energy Obesity*. Mr. Tertzakian makes it clear that the road ahead is difficult but not impossible. For those interested in how to attack the energy problem today for a better future, this is a must-read book. General John P. Abizaid (Ret.), former Combatant Commander, U.S. Central Command, and member of the SAFE Energy Security Leadership Council *The End of Energy Obesity* is a fresh look at a pressing problem . . . thought-provoking writing that's a must-read for those concerned about the way forward for the industrialized world. The Honourable Peter MacKay, Minister of Defence and Minister for the Atlantic Gateway, Government of Canada Peter Tertzakian's prose is fun to read, and the analogies are so apt. For anyone concerned about how we go on an energy diet, this book is a must-read. Matthew R. Simmons, Chairman, Simmons & Company International, author of *Twilight in the Desert: The Coming Saudi Oil Shock*

and the World Economy This book explores the critical role networked IT solutions play in changing the way energy is used and delivered. The network truly becomes a platform for monitoring and managing energy consumption in a much more efficient way, and we expect the benefits to accelerate as the network becomes more pervasive. Tertzakian shows the reader how networked collaboration technologies such as TelePresence can enable powerful, face-to-face interactions while reducing our energy appetite and carbon footprint. John Chambers, Chairman and CEO, Cisco
