

# The Science of Toys: Volume 2: Data & Graphs for Science Lab

This book contains graphs showing the position of toys in motion as they are pulled by gravity in free-fall and on inclined surfaces. Data is presented on a variety of shapes of blocks and balls, plus a cylinder, as they move across wood and metal surfaces. Coordinated graphs also show toys as they are pushed by a time-limited force on a flat surface and allowed move freely until coming to rest. These data can be used for lesson plans by teachers and parents. Bonus Material: Graphs of the motion of dominos as they fall and motion of various objects through a loop-de-loop provide an additional challenges for students.
