

ENWRAPPED BY THE QUANTUM : English Edition: WE LIVE WITHIN THE WORLD OF THE ZERO-DIMENSION

The Universe we are living in, from the very beginning was the world of Zero. It was the world where nothing existed. Nothing but Energy. And, at the time of the Big Bang, the 3-dimensional world was born. In this illustrated book I will explain my hypothesis on how the 3-dimensional world was created from the World of Energy at the Moment Zero. And finally, I will tell you what kind of world we are living in. Contents Introduction The world we live in, started its existence from nothing. The world of 3-dimension began. Quantum belongs to the Zero-dimension. The Three-dimensional world is enveloped inside the Zero-dimension. Afterword @I have combined this research field to the publication of this book, was named Information physics.

E-Infinity Spacetime, Quantum Paradoxes and Quantum Gravity A virtual particle, generally, is a disturbance in a field that will never be found on its . electric charge, but with total charge zero, like the incoming photon itself. . might be that we live in a world that has some of its dimensions wrapped up (think . In general, what we have in quantum fields are disturbances of many types. **WE LIVE WITHIN THE WORLD OF THE ZERO-DIMENSION** M-theory is a theory in physics that unifies all consistent versions of superstring theory. . This theory, like its string theory predecessors, is an example of a quantum In everyday life, there are three familiar dimensions of space: height, width and .
